PREFACE

K.A. Seifert, Z.W. de Beer and M.J. Wingfield	i
---	---

PART 1: Taxonomy & Phylogeny

The ophiostomatoid fungi: their dual position in the <i>Sordariomycetes</i> – Z.W. de Beer, K.A. Seifert, and M.J. Wingfield	1
Emerging lineages in the <i>Ophiostomatales</i> – Z.W. de Beer, and M.J. Wingfield	21
An overview of <i>Leptographium</i> and <i>Grosmannia</i> – K. Jacobs, and M.J. Wingfield	47
<i>Ceratocystis</i> : emerging evidence for discrete generic boundaries – B.D. Wingfield, M. Van Wyk, H. Roos, and M.J. Wingfield	57
<i>Ceratocystis</i> species in the <i>Ceratocystis fimbriata</i> complex – M. Van Wyk, B.D. Wingfield, and M.J. Wingfield	65

PART 2: Biodiversity

Ophiostomatoid fungi and their associations with bark beetles in Japan – H. Masuya, Y. Yamaoka, and M.J. Wingfield	77
Ophiostomatoid fungi associated with conifer-infesting bark beetles in China – X.D. Zhou, Z.W. de Beer, and M.J. Wingfield	91
Ophiostomatoid fungi associated with the Eastern Himalayan spruce bark beetle, <i>Ips schmutzenhoferi</i> , in Bhutan and their pathogenicity to <i>Picea spinulosa</i> and <i>Pinus wallichiana</i> – T. Kirisits, H. Konrad, M.J. Wingfield, and D.B. Chhetri	99
Ophiostomatoid fungi and blue-stain in New Zealand – J.M. Thwaites, S.D. Reay, A. Schirp, W. Grinter, and R.L. Farrell	113
Ophiostomatoid associates of spruce-infesting bark beetles in North America – S. Massoumi Alamouti, M.-E. Beaulieu, L. Bernier, and C. Breuil	119
<i>Ceratocystis</i> species on the African continent, with particular reference to <i>C. albifundus</i> , an African species in the <i>C. fimbriata sensu lato</i> species complex – J. Roux, and M.J. Wingfield	131

PART 3: Ecology & Pathology

Conifer defense against insects and fungi – P. Krokene, C.G. Fossdal, N.E. Nagy, and H. Solheim	141
Pine decline in the southeastern United States and the involvement of bark beetles and ophiostomatoid fungi – L.G. Eckhardt, and R.D. Menard	155
Mites associated with bark beetles and their hyperphoretic ophiostomatoid fungi – R.W. Hoffstetter, J.C. Moser, and S.R. Blomquist	165
Taxonomy and ecology of ophiostomatoid fungi associated with <i>Protea</i> infructescences – F. Roets, M.J. Wingfield, P.W. Crous, and L.L. Dreyer	177

PART 4: Economic & Applied Aspects

<i>Ceratocystis</i> and <i>Ophiostoma</i> : international spread, new associations and plant health – M.J. Wingfield, J. Roux, B.D. Wingfield, and B. Slippers	191
Wood market issues relating to blue-stain caused by ophiostomatoid fungi in Canada – A. Uzunovic, and T. Byrne	201
The discovery of <i>Ophiostoma tetropii</i> with the Brown Spruce Longhorn Beetle (<i>Tetropium fuscum</i>) in Halifax, Canada – K.J. Harrison, and G.A. Smith	213
Cartapip and the use of albino strains of <i>Ophiostoma</i> for pulping and blue-stain control – R.L. Farrell, and J.M. Thwaites	219
Canadian experiences with biocontrol of blue-stain in logs using albino ophiostomatoid fungi – A. Uzunovic	223

PART 5: Frontiers

Towards ophiostomatoid genomics – L. Bernier	235
--	-----

APPENDIX

A nomenclator for ophiostomatoid genera and species in the <i>Ophiostomatales</i> and <i>Microascales</i> – Z.W. de Beer, K.A. Seifert, and M.J. Wingfield	245
Index	323
